FIBERGLASS DOORS

FIBERGLASS DOORS

Nan Ya fiberglass doors and composite mouldings combine modern technology with functionality and style. Nan Ya Plastics Corporation is the largest company in the Formosa Plastics Group, a world leader in plastics innovation and manufacturing. Since 2005, Nan Ya has revolutionized the door industry worldwide with water resistant technology, composite door frame components, and the development of the highest quality fiberglass doors available today.

National distribution in Canada is provided by Richersons Enterprises in Langley, BC; and Richmond Hill, ON and West Four Group of Companies Inc., with centers in Calgary, AB; Saskatoon, SK; Winnipeg, MB. Combined space of over 180,000 sq. ft. coast to coast allows us to provide the largest assortment of in-stock products, partnered with exceptional service to meet the needs of Canadian door manufacturers.

BUILT FOR THE

CANADIAN CLIMATE

Unsurpassed vertical integration and ISO 9001 / ISO 14000 monitored manufacturing processes help support the R&D team.

- **High impact compression moulded fiberglass skins** are “weatherproof” and will not delaminate, corrode, mold or mildew. Nan Ya fiberglass doors also do not dent, rust, warp, crack, split, splinter, or rot and are very easy to keep clean.
- **Waterproof composite stiles and rails** are sealed and beautifully finished to protect all edges of the door from moisture penetration which could harm the inner insulation. The composite material will not delaminate or splinter and boasts twice the screw-holding capacity of typical wood-edge doors. The top and bottom rails are also composite components that prevent water seepage, are easy to trim and pre-machined to accommodate the bottom weather sweep. This patented innovation protects every Designer Arch fiberglass door from moisture infiltration.
- **Full length lock block** and more internal structure than any door of its kind in North America. This structural reinforcement also ensures added security against forced entry and provides incomparable stability.
- **Guaranteed.** Nan Ya backs every door with a 25 year limited manufacturer's warranty. Not only do they stand behind any manufacturing defects, they also warrant against ‘thermal bow’.

MODERN TEAK

TEXTURED FIBERGLASS

Long praised for its natural beauty and endurance to the elements, teak has become one of the most valued wood species on the planet. This modern fiberglass teak design is perfect for contemporary or traditional design.

Though the teak series is beautiful with any hardware combination, European styling is achieved when paired with an architectural door pull and deadbolt combination.

When ordered, these slabs arrive as a light almond colour to accept paint or gel stain.

TG71
31 3/4, 33 3/4, 35 3/4 X 79, 84

TEAK FLUSH

TEXTURED FIBERGLASS

As a continuation of our popular Teak design, the **Teak Flush** fiberglass door adds a contemporary but classic touch to any entranceway.

Achieve a fresh and distinctive look by adding a few simple grooved lines or stainless-steel decorative elements.

OPEN & BEADED

TRADITIONAL OAK

Open & beaded fiberglass slabs feature sleek lines, providing the perception of a more enhanced viewing area. Smooth white or oak woodgrain slabs are consistent from door edge to glass, incorporating the glass directly into the door and creating a clean, uninterrupted look.

The slab is manufactured as an open and beaded mould with removable glass stops and an opening to accept a glass insert that can be interchanged in an event of glass failure or a change of home owner's taste. The flush glazing keeps the unit water and weather resistant for years to come.

NEULITE

SMOOTH

With simple and aesthetically clean glass beadings, Neulite Open & Beaded doors are designed to complement today's contemporary home decors. The shaker-style beadings allow for a 1" standard glass thickness and all standard size glass inserts, whether it be decorative, privacy, textured or completely clear. This collection is so versatile that it can be used as an elegant front entrance or an escape to a backyard garden oasis.

HYDROSHIELD PROTECTION

Crafted with Hydroshield Technology, every Richersons Open & Beaded door contains the best combination of performance, durability, security and appearance.

Richersons Open & Beaded doors are precision engineered to provide protection against water infiltration. The specially engineered composite material will never absorb water, eliminating the problems commonly associated with wood and metal doors.

COMPOSITE

JAMBS & ACCESSORIES

Maintenance-free smooth white or woodgrain composite offers all the strength and convenience of wood with enhanced properties, providing a moisture and damage resistant product suited for the Canadian climate.

Though machined with the same process as traditional wood door frames, solid composite provides twice the holding power of wood. While similar door frames may crack or bow under the intense cycle of the Canadian climate, Nan Ya's composite door frames have proven to stand proud against the test of time.

Research shows that in most forced entry situations, door system failure lies within the frame, not the door slab. Our composite frame will not splinter or crack, providing a virtually indestructible product and reducing forced entry concerns.

Nan Ya's premium composite frames – an innovative alternative to traditional wood frame construction.

- Textured woodgrain or pre-pigmented smooth white frame components are a blend of PVC and wood fiber composite substrate.
- Solid composite provides twice the holding power of wood.
- Will not discolour, absorb moisture, splinter, or rot.
- Textured woodgrain composite components have a realistic rich appearance requiring paint or stain.
- Jamb can be painted or stained to your requirements.

FIBERGLASS

DOOR SLABS

Specifically designed to withstand the harsh Canadian climate.

Exceptional Security

Our full length steel reinforced wood lock block offers exceptional security while allowing a range of hardware mounting options.

Energy Efficiency

Filled with an insulating core of 100% CFC-free polyurethane foam, providing an excellent R rating, while bonding the two door skins together.

Performance

Rigid structure prevents bowing and warping in extreme temperatures. The fiberglass skins are resistant to dents, dings, splintering, and corrosion.

Completely Waterproof

Our full length composite stiles and rails provide complete waterproofing for the door's insulation. These stiles will not splinter like wood or delaminate like steel.

Composite Stile

Full length wood block reinforcing

Steel Reinforcing

CFC Free Polyurethane Core

- Environmentally friendly - 100% CFC free
- Rigid core to provide dimensional stability
- 6x more energy efficient than wood doors
